CORRIGENDUM - III

Please refer to our NIT No. NESAC/1216/2020 dated 04.09.2020 for Procurement of Telemetric River Discharge Monitoring System with dual (simultaneous via INSAT and GSM/GPRS network) data transmission facility for KHEP Hydro-met Monitoring Project. We hereby amend the tender with the following **Additional Information** and also the last date for submission and opening of tender has been rescheduled to the extend indicated as below :

NIT No. NESAC/1216/2020 dated 04.09.2020

Additional Information:

- The MOSDAC server details will be provided by NESAC to transmit the discharge data to the MOSDAC server via INSAT series of satellite
- The operating frequency of INSAT Transmitter is 401.63 mhz to 402.85 mhz
- The width of the channel is within 80 m (the nature of channel is dynamic). The lean and peak flow does not remain the same.
- The depth of channel during lean season is less than a meter to three meters. During the peak it is flow dependent.
- A portable ADCP might be required to verify and calibrate the SLD. The vendor has to bring the ADCP and the survey will have to be done under installation free of cost.
